Summary

Junior developer looking to break further into the tech industry. Logical thinker and steady employee that prospers in team-oriented environments to help solve complex issues and push for growth. I have a CompTIA A+ certificate which has given me the chance to break through the tech world. I'm a responsible and reliable person who has great problem solving skills and hope to use my skills to go above and beyond.

Technical Skills

Languages:

HTML, CSS, SASS, JavaScript, jQuery, Angular.JS, Bootstrap, Node.JS, React.JS, JSON

Database Development:

SQL, MySQL

Techniques and Tools:

Agile, Test Driven Development, GitHub, Visual Studio Code, Sublime Text

Technical Projects

Aurora Grove

[Check it out](#)

Created a mock camping site which users can book a trip for them and their children.

Technologies used: HTML, CSS, Bootstrap

Turret Shooter

[Check it out](#)

- Developed a game where enemies are randomly generated and gravitate towards the turret, when they collide with the turret the player loses health.
- Technologies used: HTML, CSS, JavaScript

ComfyHouse

[Check it out](#)
